

What is Go?

▶ *Give it to Me Quickly*

Go is one of the most challenging games ever discovered, and is enjoyed by millions of people all over the world. Developed in China 4,000 years ago, it is the oldest board game on Earth played in its original form.

▶ **Is It Easy to Learn Go?**

For sure. Go is famous for its simplicity of design, yet it creates a game of elegant complexity.

It is easily learned by a four year old child, yet too complex for the world's best computers to beat an advanced beginner.

Cool.

▶ **Are You Kidding?** *no!*

Top professionals make \$1 million a year.

Japan, China, & Korea all have cable TV channels devoted entirely to Go.

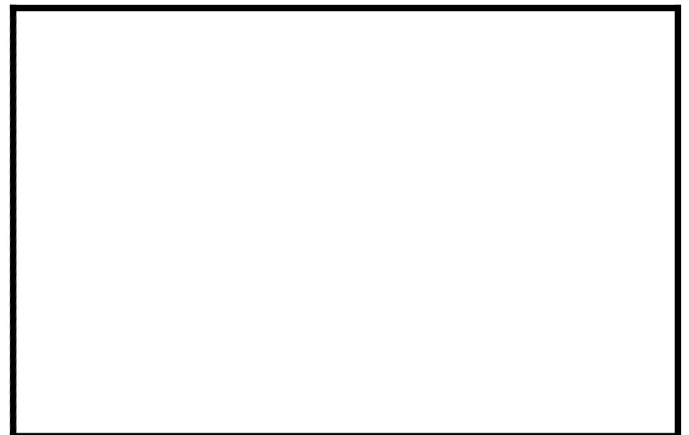

There are more possible game variations than atoms in the universe.

Four consecutive times!

Come and Play!

(Beginners are always welcome)
